

SHOPPING CENTRE HEP | Halle | project information

Facts

Aim of Project

Refurbishment of an existing shopping centre in Halle. Improvement of shopping atmosphere and dwelling qualities for customers. Trading up of existing tenants and winning additional ones. The shopping centre has to be continuously improved and changed because of a problematic location (decreasing number of inhabitants) in eastern Germany.

Design Concept

- Improvement of attractiveness to win additional anchor tenants
- Renovation of existing shopping malls (flooring/ceiling/lighting)
- Richer mix of shop units to improve tenant mix
- The refurbishment and the new architectural concept revitalises and redefines the shopping centre, develops an own identity and responds to the impact of new shopping centres in the region

Facts

Features and Benefits

Sustainable development - the existing building framework will be totally retained. The renovated shopping centre will become a shopping centre with additional retail operators taking space and develop to an attractive shopping destination

Statistics

Refurbishment since 2004
